**Understanding
The Difference
Between Annual
Wellness Check-Ups &
Acute or Chronic Visits**

HEALTHCARE THE WAY YOU HOPED IT COULD BE

ANNUAL WELLNESS CHECK-UPS

At Family Practice Center, we provide our patients with comprehensive medical care to help promote long-term health and wellness. This begins with performing annual wellness check-ups. However, many patients may not understand the difference between an annual wellness check-up and a visit to evaluate acute or chronic illnesses, medical conditions, or symptoms.

These wellness visits include 15 preventative care services that are recommended for adults including:

- *measuring vital signs like blood pressure and body mass index (BMI)*
- *assessing immunizations status*
- *screening for depression and alcohol misuse*
- *discussing appropriate cancer screenings.*

Depending on your risk factors for certain medical conditions and your insurance coverage, additional tests like EKGs and blood tests may be included as part of an annual wellness visit.

It is important to know that annual wellness visits do not include the evaluation and management of acute or chronic medical problems. Evaluation of specific medical concerns including medication refills are not covered by insurance as part of an annual wellness visit, so you should plan for additional costs if there are other concerns you'd like to address during your annual exam separate from routine preventative care.

Does not include evaluation and treatment of any illness or symptoms.

CHRONIC CARE VISITS INCLUDE:

- **Evaluation of all chronic medical conditions and diagnoses**
- **Prescription medicine reconciliation and refills**
- **Evaluation of lifestyle habits including diet**
- **Appropriate diagnostic and lab testing**
- **Coordinating care with specialists (as needed)**
- **Developing follow-up care management plans**

ACUTE CARE VISITS INCLUDE:

- **Evaluation of symptoms related to any acute illness**
- **Evaluation of any abnormality detected at physical or annual check-up**
- **Referral to specialist for follow-up care (as needed)**
- **Appropriate diagnostic and lab testing**
- **Prescription medicine reconciliation and refills**

PATIENT RESPONSIBILITY

We advise all patients to take a proactive approach to their care.

That means addressing all questions and concerns during appointments with our providers. Additionally, patients should be familiar with their health insurance benefits prior to their appointment.

It's important to contact your health insurance provider to become familiar with your benefits.

Please be aware that any additional tests or screenings may not be included as part of an annual check-up and may be subject to additional out of pocket costs.
